

WilsonPro amplifiers share the following characteristics:

- Boost 4G/LTE and 3G: data, voice, text
- Support all cellular devices - all carriers
- Higher grade coax
- Require a professional installation
- Advanced technical and installation support
- Support multiple users with the exception of the Pro Signal 4G which connects directly to a single device.
- 3 year warranty

BOOSTER TYPE	FEATURES	MODEL	IMAGE	MSRP
 M2M/IOT Solution	Recommended For: M2M installations Direct connect amplifier: Connects directly to data modem. Passive RF bypass failover: If the Signal 4G loses power, the amplifier is "bypassed" so that the external antenna maintains connection to the modem.	Pro Signal 4G 460119 [†]		\$249.99
 Large Homes, Small Businesses Up to 15,000 ft ^{2*}	Recommended For: Small Businesses and Large homes up to 15K sq ft Options: Wall-mount; Available in 50ohm or 75 ohm. Features: Digital Display to view Automatic Gain Control.	Pro 70 465134 [†]		\$1099.99
 Buildings Up to *25,000 ft ^{2*}	Recommended For: Small Businesses and large homes up to 25k sq ft Options: Wall-mount; Available in 50ohm or 75 ohm. Features: Self-optimizing with built-in signal meter for easy tower locating. + 12 dBm downlink power. Digital Display to view Automatic Gain Control.	Pro 70 Plus 463127 [†]		\$1599.99
 Buildings Up to 35,000 ft ^{2*}	Recommended For: Commercial/Enterprise up to 35k sq ft Options: Wall-mount or Rack-mount; Available in 50ohm. Features: XDR Technology: Auto adjusts gain output to prevent shut down, + 15 dBm downlink power. Color splash screen for local visibility on all bands.	Pro 1000 460236 [†] Pro 1000R 460237 [†]		\$3499.99
 Buildings Up to 35,000 ft ^{2*} Includes WilsonPro Cloud Service Integration	Recommended For: Large Businesses, up to 35k sq ft that want remote monitoring capability Options: Wall-mount; Available in 50ohm. Features: XDR Technology: Auto adjusts gain output to prevent shut down, + 17 dBm downlink power. Color splash screen for local visibility on all bands. WilsonPro Cloud service: Manage and monitor cellular amps from any device that runs a web browser. Integrators can get customizable email and text notifications to alert them to any status change of installed amplifiers, including notification if a system ever goes offline.	Pro 1000C 460242 [†]		\$4499.99
 Buildings Up to 35,000 ft ^{2*} Especially good for High Rises	Recommended For: Commercial/Enterprise up to 35k sq ft Options: Wall-mount; Available in 50ohm Features: All features of the Pro 1000 + Compensates for up to 300' of cable loss. Inline amplifier communicates directly with main amplifier (inline not sold separately)	Pro 1050 460230 [†]		\$4999.99
 Buildings Up to 100,000 ft ^{2*}	Recommended For: Commercial/Enterprise, up to 100k sq ft Options: Wall-mount or Rack-mount; Available in 50 ohm. Features: XDR Technology: Auto adjusts gain output to prevent shut down, 4 independently-controlled amplifiers in a single case.	Pro 4000 460223 [†] Pro 4000R 460231 [†]		\$9999.99

^{*}Using 4 server antennas per amplifier
